Dear Hiring Team,

With 14+ years in full-stack development and technical leadership, I specialize in building scalable web and mobile applications using **React.js**, **Node.js**, **Python** and **Azure**. My expertise in leading high-performing teams makes me ideal for innovative technical roles where quality and scalability are paramount.

At **UBS**, I lead the development of the **Client Advisor Workbench**, optimizing performance for 200+ financial advisors. My career is defined by delivering high-impact platforms, such as **Recruitment Central** at **EPAM** and the **Lennar Nova** platform at **Mindstix**. I've experience of **mentoring** teams of up to 8 developers and implementing **Micro Frontends** and cloud-native architectures that align technical execution with business strategy.

I stay at the forefront of the industry through personal **AI research**. I have gained hands-on experience integrating **Gemini** and **DeepSeek** APIs into custom applications and experimenting with local LLMs via **Ollama**. Furthermore, I have optimized my own engineering productivity by mastering AI-augmented workflows using tools like **Cursor**, **Cline**, and **Copilot**, insights I often bring to help accelerate delivery cycles.

I'd welcome the opportunity to discuss how I can contribute to your team.

Thank you for your consideration.

Best regards,

Vishwajeet Kondi
