Dear Hiring Team,

With **14+ years** in full-stack development and technical leadership, I specialize in building scalable web/mobile applications using **React.js, Node.js, React Native, and Azure**. My expertise in architecture optimization, team leadership, and end-to-end delivery makes me ideal for innovative technical roles.

At **UBS**, I lead development of the **Client Advisor Workbench (React.js)**, enhancing performance for 200+ financial advisors. Previously at **EPAM**, I architected **Recruitment Central**, streamlining processes for 100+ recruiters. At **Mindstix**, I built the **Lennar Nova platform (React.js/Node.js/Azure/GraphQL)**, significantly improving scalability for 500+ users.

I excel at mentoring teams (up to 8 developers) and accelerating deliveries. My skills in **Micro Frontends, React Native, and cloud technologies**, combined with clean code principles, ensure solutions meet both technical and business needs.

I'd welcome the opportunity to discuss how I can contribute to your team. Reach me at +91 74480 13092 or vkondi@gmail.com.

Thank you for your consideration.

Best regards,

Vishwajeet Kondi
